## **Executive Summary**

The Community and Home Options to Institutional Care Program (CHOICE) was established during the 1987 legislative session through House Enrolled Act (HEA) 1094 and began as a pilot program in Knox, Daviess, and Tippecanoe counties in 1988. The program went through several expansions that resulted in services to all of Indiana's 92 counties in 1992. CHOICE is funded exclusively with state dollars.

CHOICE funding for services is used after all other possible payment sources have been identified and all reasonable efforts have been employed to utilize those sources. To be eligible for CHOICE funding of services, an individual must be a resident of Indiana and be at least 60 years old or older, or disabled. Throughout SFY 2004, the CHOICE program continued to offer community and home care services to those individuals who met eligibility requirements.
